

# Muhammad Tayyab Ahmed

## Senior Full Stack Developer | MERN Stack Developer

Lahore, Pakistan | ahmedtayyab533@gmail.com | +92-305-1234336

[GitHub](#) | [Portfolio](#) | [LinkedIn](#)

### PROFESSIONAL SUMMARY

---

Senior Software Engineer leading full-cycle delivery of React.js, Next.js, and MERN stack applications with secure Node.js and REST API backends. Leads a professional engineering team, improves application performance, and strengthens cloud deployments on AWS EC2 with Nginx and PM2. Builds authentication, state management, and database structures that support scalable enterprise software.

### CORE COMPETENCIES & TECHNICAL SKILLS

---

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** React.js, Next.js, Tailwind CSS, Zustand/Redux Toolkit, React Query
- **Backend:** Node.js, Express.js/Nest.js, Fastify, REST APIs
- **Database:** MongoDB, PostgreSQL
- **Cloud:** AWS (EC2), Azure
- **DevOps:** PM2, Nginx, CI/CD Pipelines
- **Testing:** Postman, Chrome DevTools
- **Tools:** Git, GitHub, VS Code
- **Methodologies:** Agile, Scrum, Software Development Life Cycle (SDLC)

### PROFESSIONAL EXPERIENCE

---

#### Hashed System

*Senior Software Engineer | Jan 2023 – Present*

- Spearhead the end-to-end architecture and full-cycle development of high-performance scalable web applications, leveraging Next.js and the MERN stack.
- Lead and mentor a cross-functional professional engineering team, fostering a culture of technical excellence and Agile collaboration.
- Architect responsive, dynamic user interfaces utilizing React.js, Next.js, TypeScript, and Tailwind CSS, ensuring optimal cross-browser compatibility and SEO.
- Implement authentication and authorization frameworks to safeguard sensitive client data across enterprise platforms.
- Lead API integrations and direct technical infrastructure for FUFA platform, incorporating live video streaming via Datavideo NVS-40 and audio playout via Butt software.
- Manage server-side deployments and cloud infrastructure on AWS EC2, configuring Nginx and maintaining robust process monitoring utilizing PM2 within Linux environments.

- Enforce rigorous code reviews, version control via Git, and performance optimization techniques, significantly elevating overall application quality and scalability.

## **NaskSoft**

*Software Engineer | Aug 2022 – Dec 2022*

- Designed and deployed dynamic, highly responsive single-page web applications (SPAs) utilizing React.js and modern JavaScript frameworks.
- Authored and maintained resilient backend systems and REST APIs in Node.js, facilitating seamless internal data flow and cross-platform integrations.
- Executed critical application performance optimizations, improving rendering speeds and minimizing frontend load times.
- Integrated third-party APIs and streamlined secure authentication processes, enhancing the security posture of user-facing web portals.
- Collaborated tightly with product managers and QA engineers within an Agile framework to iteratively deliver high-value software features.
- Led regular code refactoring initiatives and peer code reviews, establishing best practices for maintainability and code quality.
- Modernized legacy codebases by migrating essential components to modular, reusable React.js architectures.

## **TECHNICAL PROJECTS**

---

### **WayFit | <https://wayfitco.com/>**

- **Project Overview:** A comprehensive smart fitness and class booking platform featuring dynamic schedule management and credit-based booking.
- **Responsibilities:** Architected the core scheduling engine and real-time user update systems to manage class registrations seamlessly.
- **Technologies Used:** Next.js, Node.js, PostgreSQL, Tailwind CSS, PM2, AWS EC2.
- **Business Impact:** Delivered a flexible credit booking system that enhanced user retention and streamlined administrative scheduling tasks.
- **Challenges Solved:** Resolved complex synchronization challenges in schedule management, ensuring reliable real-time updates for concurrent users.
- **Deployment:** Orchestrated robust backend deployment on Linux environments utilizing PM2 for continuous process monitoring.

### **Venuze | <https://venuze.com>**

- **Project Overview:** A fully responsive, modern web application focused on maximizing user engagement through intuitive front-end design.
- **Responsibilities:** Engineered the frontend architecture from the ground up, translating UI requirements into functional, accessible components.
- **Technologies Used:** Next.js, Tailwind CSS, JavaScript (ES6+), Git.

- **Business Impact:** Elevated the digital presence of the platform, resulting in enhanced accessibility and a highly engaging user experience.
- **Challenges Solved:** Overcame cross-browser rendering inconsistencies to provide a unified experience across modern mobile and desktop environments.
- **Deployment:** Hosted leveraging modern CI/CD pipelines via Vercel to ensure rapid, globally distributed content delivery.

#### Reachgin Booking (Linkspos) | <https://reachgin-booking.vercel.app/>

- **Project Overview:** An optimized booking and point-of-sale (POS) integration web application engineered for modern business operations.
- **Responsibilities:** Led full-stack architecture, managing responsive client-side interfaces and complex backend logic to ensure seamless booking workflows.
- **Technologies Used:** React.js, Node.js, REST APIs, Tailwind CSS, MongoDB, Git.
- **Business Impact:** Streamlined the appointment and transactional process, providing businesses with an integrated, high-availability POS solution.
- **Performance Improvements:** Minimized latency in the booking engine by optimizing API response handling and state management.
- **Deployment:** Deployed scalable frontend assets via Vercel ensuring continuous delivery and high uptime.

#### Sapius | <https://getsapius.co.uk/>

- **Project Overview:** A streamlined, high-performance web platform tailored to precise enterprise client specifications.
- **Responsibilities:** Developed bespoke UI components and established secure, scalable RESTful API communication layers.
- **Technologies Used:** React.js, Express.js, TypeScript, Node.js, PostgreSQL.
- **Business Impact:** Accelerated the client's digital strategy by delivering a customized, scalable frontend architecture that directly met precise specifications.
- **Performance Improvements:** Achieved significant improvements in page load speeds through efficient component rendering and state management.
- **Deployment:** Executed rigorous staging deployments to facilitate testing and seamless production rollouts.

#### Cacheo Garage | <https://cacheo.vercel.app/>

- **Project Overview:** A comprehensive scalable web solution engineered for automotive service management, scheduling, and routing.
- **Responsibilities:** Built specialized booking interfaces and managed robust backend routing systems for service tracking.
- **Technologies Used:** React.js, Node.js, REST APIs, Tailwind CSS.
- **Business Impact:** Digitized garage operations, significantly improving appointment throughput, service scheduling, and operational transparency.

- **Performance Improvements:** Enhanced application efficiency, reducing server-side processing overhead during peak booking workflows.
- **Deployment:** Maintained automated deployment workflows, ensuring zero-downtime updates during critical business hours.

## PROFESSIONAL ACHIEVEMENTS

---

- Successfully engineered and launched 5 production-grade web applications utilizing modern JavaScript frameworks, Next.js, and scalable cloud architectures.
- Led and scaled a professional technical team, significantly improving sprint velocity, code quality, and product delivery lifecycles.
- Directed the complex technical infrastructure for the FUFA streaming platform, successfully bridging web interfaces with dedicated video encoding hardware.

## EDUCATION

---

### **Khawaja Fareed University of Engineering & Information Technology**

Bachelor of Software Engineering | Expected in 07/2022

Rahim Yar Khan, Punjab, Pakistan

## LANGUAGES

---

- **English:** Professional Working Proficiency
- **Urdu:** Native/Bilingual Proficiency
